

INTERMEDIATE REPORT – **ASSIGNMENT 1A**

COMPUTATIONAL BIOFLUID MECHANICS
ACADEMIC YEAR 2025-2026

Name student

Prof. Charlotte Debbaut, Prof. Patrick Segers

Dr. ir. Mohammad Rahimi Gorji, ir. Saar Vermijs, ir. Jessie Duquesne,
ir. Kaat Wille, ir. Irea Vervaeke

ASSIGNMENT 1A: CFD PAPER

Identify the main research question of this paper, the methods that the authors used to answer this question, the results, the limitations and whether you think the authors succeeded in answering their research question. Structure this page according to the sub-topics mentioned in the previous sentence ('Goal', 'Methods', 'Results', 'Limitations', 'Evaluation'). Each sub-topic can contain max. 150 words. If relevant for the methods or results, you can include figures (max. 3 figures in total). Make sure each figure has a number, caption and reference.
